

PROJECT Question

Create an online examination portal for conducting online examination for Fresher recruitment .

Portal must have the following features:

1. A candidate **registration page** in which candidates have to enter their details (**Personal + Educational**).
2. Already **registred candidate** must be directed to the **examination page** or instruction page after entering his registered **emai-id and password**.
3. Once candidate entered to the examination page he/she must get the questions **one-by-one** along with the multiple choice answers.
4. For each correct answer, his/ her marks should be **calculated in the backend**.
5. **Time limit** must be set for each candidate.
6. Candidates are given privilege to submit the exam before the time limit.
7. If the time **limit expires**, it should display a message and **automatic submission** of exam should be done.
8. Once candiadte submitted the exam, **total mark** should be **displayed**.
9. Number of attempted questions, number of correct answers, number of wrong answers and the **correct answer** for the **wrongly answered questions** must also be displayed.
10. On clicking LOGOUT button, he must be taken to '**Thanks Giving**' page.

Note:

- Each form must be provided with required validation.
- Registration details must be added to a database.
- Make your project user friendly by providing pop-up messages.
- Questions has to be fetched from database for each candidate.
- When a candidate LOGOUT happens, his details along with acquired marks has to be stored to database.
